

ASSOCIATION OF SCUBA SERVICE ENGINEERS & TECHNICIANS

## Guidance Note: Cylinder Labels – 08/06.

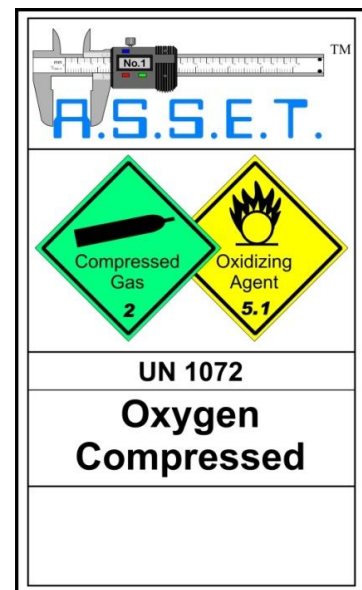

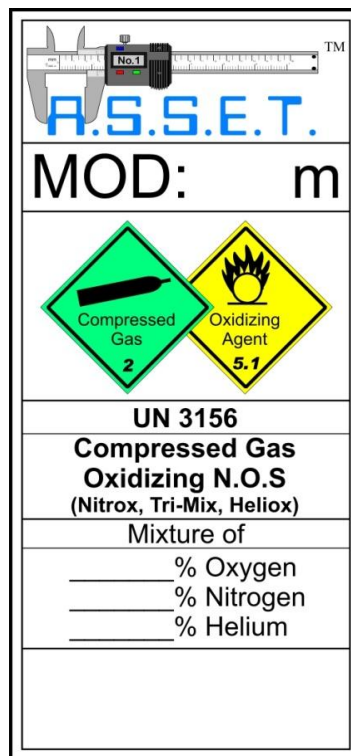

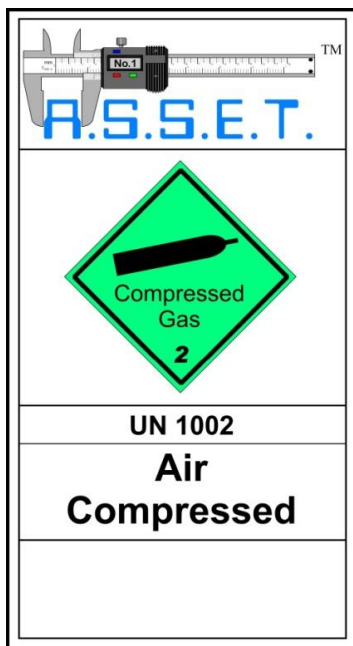

### Amendment 02 – 10/11

In February 2005 the HSE circulated a document containing the rationale for a scuba cylinder label with suggested layouts for three specific labels. The advantage of this arrangement is the reduction in the total number of labels that may be required. Three labels are suggested:

1. Air Compressed
2. Oxygen Compressed
3. Compressed Gas Oxidizing N.O.S.

Note: N.O.S. means “Not Otherwise Specified” i.e. a gas or gas mix that is not specifically listed in ADR (Nitrox, Heliox and Tri-mix are all N.O.S. gas mixtures)

Taking this advice into account and updating it with the requirements of BS EN ISO 7225 (supersedes BS EN 1089 Pt 2), ASSET has produced the following example artwork that members may find useful. **This artwork is available to ASSET Members free of charge.** In addition an O2 Clean label is also available to ASSET certified Nitrox Technicians. Contact [scubatechnician.com](http://scubatechnician.com) for further details.

*This guidance is offered in good faith and is believed to be correct to the best of our knowledge. Nothing contained herein shall be deemed to override good practice, manufacturers' policies, the relevant Standards and the Law.*
